

Introduction (key concepts)

- The Fanartminator is an inter-community art competition.
- We propose that the best artists from across the world are brought together to confront each other and test their level in a competition.
- Participants must read and abide by the rules below.

Rules

- The theme of the contest is “Create a poster to present the Goultarminator.” All submissions will be evaluated on their artistic quality and adherence to the theme.
- A submission may be in black and white or in color.
- No words, names, or signatures are allowed to be included a submission.
- Any artistic media may be used (paper, cardboard, wall, window, glass, canvas, etc), and a wide variety of tools and techniques are permissible (pencil, pen, acrylic, oil, aerosol paint, crayon, charcoal, etc)
- All submissions must be created by hand. No computer-generated designs will be accepted.
- Designs created with a collage of existing pictures and other similar techniques (like photomontage or digital montage) will not be accepted.
- It is permitted to make small adjustments (such as tweaking contrast or color balance) to an existing drawing with computer tools, but any major alterations (editing, cleaning, coloring, changing from color to black and white or vice-versa) via computer are not allowed.
- Drawings copied from other sources will not be accepted.
- Sketches and drawings which are obviously created without effort will not be accepted. To participate, the applicant must show their true level of skill and commitment to the contest.
- One drawing per account and per person.
- The participant must indicate which server their drawing is representing. Accounts created specifically for the contest will not be allowed; players are expected to participate with their true accounts and support the server that they play on the most. Any design submitted with a mule account can be disqualified at the discretion of the contest organizers.

Procedure

- Participants must submit their design on a special thread created for the purpose of the contest on the forum of their server’s community.
- The drawings must be submitted to the contest thread before August 17 at 9:00 GMT +1.

- For those who represent the servers Oto Mustam or Aermyne: they may submit their drawings on the forum that matches their language group.
- Each community will choose a short list of finalists from all of their submissions. Each community may pick a specific number of pictures from all of their servers. There is no requirement to represent each server of the community equally. The number of submissions per community is weighted by their size and the list is as follows:

DE, IT, UK, NL: 3 images

PT / BR: 5 images

ES, INT: 10 images

FR: 15 images

A jury of Ankama artists will select 10 winners from all of the finalists.

Prizes
